

AORA's Principles

- Improve Australia's response to issues of soil health, food security and human health.
- Provide support to a diverse, competitive, innovative, and profitable industry.
- Promote good practice and sound environmental management.
- Promote dialogue with local communities, government and regulatory authorities.
- Assist in promoting a sustainable, financially viable marketplace.
- Encourage the recovery and beneficial reuse of organic resources.
- AORA supports its members, helping them to achieve their objectives through the development and promotion of good practice and the creation of a sustainable regulatory framework.

Membership

AORA is a national association. We welcome new members to help build on the strength and skills of the association.

For processors and associated industry members the association provides a venue for the exchange of knowledge and experience.

For government the association provides the opportunity to understand industry practice and consultation on policy development.

AORA welcomes new members

Australian Organics Recycling Association

aora

australian organics recycling association

The Industry Association for Organics Recycling

The Australian Organics Recycling Association Limited (AORA) has been established as a result of the growth of the organics composting and recycling industry in Australia and the desire of processors to have independence from the waste industry.

AORA has a broad membership associated with the use and promotion of recycled organics.

AORA provides the industry with a focused united voice and will lobby all levels of government on behalf of our members.

“AORA is the peak industry body for industry, Governments and private enterprise which have an interest in organics recycling”

Paul Coffey, Director

It's all about Organics

AORA works on behalf of its members including processors, associate industries, educators and all levels of Government to raise awareness of the benefits of recycling organic resources.

We act as an advocate for the wider organics resource recovery and beneficial reuse industries and represent their views in a constructive dialogue with policy makers. AORA envisages an industry where best practice is shared, standards are maintained and surpassed and which makes a positive contribution to safeguarding the environment.

We represent:

- The recovery and composting of organic resources.
- The collection, sorting and/or processing of recyclable organic materials, suitable for reuse as products beneficial to the environment.
- The management and operation of materials recovery, recycling, reprocessing and similar facilities and sites.
- All other activities incidental to the conduct of the organics recovery and recycling industry.

Our objectives & values

AORA is the leading industry organisation and the peak industry body for the Recycled Organics Industry in Australia.

It represents a modern, proactive, not for profit organisation within the wider resource recovery and organics management industry.

Our values:

- Effective representation for its members.
- Encouragement and communication of good practice.
- Provision of information in a timely and appropriate manner.
- Delivery of value for money for its members.
- Pro-active industry advocacy.
- Accessibility to members, policy-makers, the press, regulators and local, state, territory and national Governments.
